

# Mechanical Insulator

## DESCRIPTION

CCC Thermal Insulation is looking to add an experienced Mechanical and Piping Insulator to our Indianapolis team!

Mechanical and piping insulators apply insulation to pipes, ducts, tanks, and other mechanical systems to control temperature, reduce energy loss, prevent condensation, and protect personnel from hot or cold surfaces. Working in industrial, commercial, and residential settings, they use materials like fiberglass, foam, and rubber, requiring skills in measuring, cutting, and fitting insulation in various, sometimes confined, spaces.

Submit your resume today — and join a team that truly values your talent and hard work!

## RESPONSABILITIES

- Install insulation on pipes, water lines, drain lines, ductwork, boilers, and other equipment to manage temperature and protect systems.
- Measure, cut, and prepare various insulation materials, such as fiberglass, foam, and rubber, for application.
- Apply insulation to prevent heat and cold transfer, reduce energy consumption, and control condensation and noise.
- Inspect existing insulation, remove old or damaged materials, and make repairs as needed.

## REQUIREMENTS

- Minimum 2 years of experience in mechanical insulation (industrial or commercial projects).
- Knowledge of materials such as fiberglass, foam, or mineral wool.
- Ability to travel and work on job sites.
- Valid work authorization in the U.S.

## INTERESTS

- Full-time

## BENEFITS

- Health Insurance

## LOCATION

Indianapolis, Indiana / USA
